Subject: Pavillion

Ramona,

A quick follow up on our discussion about the issue of reviewing the EPA report with the new sampling data from Pavillion. Although folding this into the current draft report would be desirable from one perspective, I looked at the schedule again and I do not see how this will be possible unless we delay the peer review -- which is not a viable option. Cindy will have a better handle on this. In addition, I think there will be some communication challenges if we make significant changes to the draft report, which as you know has been in the public's hands for many months and is about to undergo peer review.

A clarification regarding the release date of the USGS report -- Unless Lek has contacted Marcia McNutt (following our meeting with Bob S.), as far as I am aware, there has been no contact between EPA and USGS about this above the Donna Myers level. Someone from EPA senior leadership should contact Marcia very soon to have this discussion.

Fred
